2. Implementation of corporate ERP system and Deliveries

Our company is a part of ERIKS Group. We are implementing the corporate ERP/SAP system to support our business growth.

SAP Go Live is planned for **April 2024**.

A challenge of any ERP Implementation is increased lead times during the initial phase after go-live. Our project team is carefully managing potential risk and taking action to minimize it as much as possible. If your order is somehow still impacted, you will be consulted by our experts prior to sending our order confirmations. They will work with you to find a solution that minimizes the impact on your business.

3. We would like to emphasise that our company **business currency is EURO (€)** only. Could you kindly update your ERP database accordingly.
